IN THE CLAIMS:

Please add the following claims:

sub-F4
1. (Twice Amended) The method of communicating between a host computer and a remote terminal over a data network comprising steps of:

d1
establishing a first communication session between said terminal and a communications server via a first communications channel;

downloading, from said server to said terminal, communications software for communicating between said terminal and said host; and

utilizing said communications software to implement a second communications session between said terminal and said host via a second communications channel independent of said server.

sub-F5
22
8. (Amended) The method of communicating between a host computer and a remote terminal
